

Twisted

Lisa Stansfield

If you've ever been in love
Then you know just how I feel
If you've ever been in love
You'll do anything for another kiss
Ever wanting more
You lose your mind until
He's knocking at the door
How your body aches 'til he's home again

And when you're in his arms
You know it's meant to be this way
Nothing on earth can make you feel afraid

So here I am again my love
Twisted round your finger
And I don't give a damn because it feels so good
So weave your wonder web my love
And baby let me sing
A lullaby to make you stay

If you've never been in love
Let me tell you how it feels
The agony of want
Oh the belly ache 'til he's home again

But when he's in your arms
You know it's where you wanna be
Nobody else on earth can set you free

So here I am again my love
Twisted round your finger
And I don't give a damn because it feels so good
So weave your wonder web my love
And baby let me sing
A lullaby to make you stay
A lullaby to make you stay

If you've never been in love
Know the danger that it brings
But when you're dancing on the floor
An apocalypse don't mean anything

Cos he's holding you in his arms
You know you really have come home
This heaven on earth could melt a heart of stone

So here I am again my love
Twisted round your finger
And I don't give a damn because it feels so good
So weave your wonder web my love
And baby let me sing
A lullaby to make you stay
A lullaby to make you
You stay
