

I've been up so late  
Stomach sick to my core  
I know all of the things  
I've gotten wrong before

If you're still here in the morning  
It wasn't a dream  
I'm fucked up and you're perfect

I went from 666 to 777  
I think I died and I went to heaven  
I think you can be the one that makes me happy  
So happy

First kiss set me free  
Ripped these chains off my wings  
I'm the luckiest guy  
You saved the hell out of me

When they see us together  
They wish they were me  
Girl, we're so fucking perfect  
Yeah yeah yeah

I went from 666 to 777  
I think I died and I went to heaven  
I think you can be the one that makes me happy  
So happy

I'm so glad you found me when you did  
Life before I met you could've been  
The death of me

I went from 666 to 777  
I think I died and I went to heaven  
I think you can be the one that makes me happy  
So happy

Happy  
So happy  
And I'm never going back
