

All Eyes on Us

Lit

We head out round nine
Gonna try and slip in somewhere nice and quiet
Baby hide in the low light booth in the back
But all that changes real fast

When her song starts playing
She stands up she's swaying
And I can't blame em all for watching
She's on fire and I can't stop it

The way she's leaning in real close
Sipping that mix drink real slow
Ain't no way we can lay low
We got all eyes on us
I can take her anywhere
I know that they're gonna stare
All she gotta do is whatever she does
All nights all eyes on us

They can't look away
Double shots turn into double takes
She'll make that table set her stage
And I got the best seat in the whole damn place

The way she's leaning in real close
Sipping that mix drink real slow
Ain't no way we can lay low
We got all eyes on us
I can take her anywhere
I know that they're gonna stare
All she gotta do is whatever she does
All nights all eyes on us

When her song starts playing
She stands up she's swaying
And I can't blame em all for watching
She's on fire and I can't stop it

The way she's leaning in real close
Sipping that mix drink real slow
Ain't no way we can lay low
We got all eyes on us
I can take her anywhere
I know that they're gonna stare
All she gotta do is whatever she does
All nights all eyes on us

The way she's leaning in real close
All eyes on us
Ain't no way we can lay low, we got
All eyes on us

I can take her anywhere
I know that they're gonna stare
All she gotta do is whatever she does
All nights all eyes on us
