

Back with You

Lit

I wanna get back with you
Go on living too fast, maybe crash with you
Nothing else in this whole world compares to you
I wanna get back with you
I wanna get real with you, say to you
All the things I shoulda said to you, wanted to
That I was too cool, too proud to admit to
I wanna get back with you

I wanna get in the car and comb all the weight off me
I wanna feel all you all over me
All over again and again and again and again
It don't have to end
If you don't want it to

I wanna get drunk with you, high with you
Do everything wrong, everything right with you
Lie with you, underneath them stars with you
Unbreak that heart for you
I wanna get back with you

I wanna get in the car and comb all the weight off me
I wanna feel all you all over me
All over again and again and again and again
It don't have to end
If you don't want it to

I wanna get back with you!

I wanna get mad with you, fight with you
Just to get to make, make up love with you
Like we do
I wanna get lost and found
Wake up somewhere with you
I wanna get back with you

I wanna get in the car and comb all the weight off me
I wanna feel all you all over me
All over again and again and again and again
It don't have to end
If you don't want it to

I wanna get in the car and comb all the weight off me
I wanna feel all you all over me
All over again and again and again and again
It don't have to end
If you don't want it to

I wanna get back with you
(Again and again and again and again)
Yeah I wanna get back with you
I wanna get back with you
