

## Lipstick & Bruises

Lit

You kiss me on the way up  
Kick me when I fall down  
Under the radar  
Stick me in the lost and found  
Lipstick and bruises  
Up and down

This is what you always wanted  
It's what you asked for  
This is what you always wanted  
And now you want more

Now these are all your new friends  
Baby, you're a rock star now  
Runnin' with the devil  
Kiss me when the lights go down  
Lipstick and bruises  
Up and down

Kiss me when the lights go down  
Lipstick and bruises  
Up and down

This is what you always wanted  
It's what you asked for  
This is what you always wanted  
And now you want more  
And now you want more  
And now you want more  
It's what you wanted  
It's what you needed  
And now you want more
