

# Good People

Little Big Town

They say you are who you hang with  
It's no coincidence I wanna hang with you  
Rise and fall together and trouble is better in twos

Sometimes it feels like a magnet  
The way that crazy sticks with its own kind  
I don't believe in E.S.P. but you can read my mind

Good people know, good people know  
Good people  
Good people know, good people know  
Good people

A good friend would bail you outta jail  
But a better one would be handcuffed to you  
Everyone's a winner when all the winners lose

Good people know, good people know  
Good people  
Good people know, good people know  
Good people

You can always spot another one when they're nearby  
No matter where you look you're gonna find

Good people know, good people know  
Good people  
Good people know, good people know  
Good people

We're guilty by association  
Keepin' company with onery company  
Runnin' around with rogues  
And rounders 'cause we believe

Good people know, good people know  
Good people  
Good people know, good people know  
Good people

You can always spend another one when they're nearby  
No matter where you look you're gonna find

Good people know, good people know  
Good people  
Good people know, good people know  
Good people

(Good people, good, good people)
