Runabout

Little Dragon

Rushing out the door at midnight I found myself breathing fire There's just one way to cure my heart from you 'Cause I can't let go, I'm still loving you so

Go run about the streets like it's a race Go run about, run about Oh, with the perfect plan you play with What you can and run about

You think you've got it all set up now This fever caught me in the rush There's just one way to cure my heart from you Because I can let go, I'm still loving you so

Go run about the streets like it's a race Go run about, run about Oh, with a perfect plan you play with What you can, run about

Go run about the streets like it's a race Go run about, run about Oh, with a perfect plan you play with What you can

Go run about the streets like it's a race Go run about, run about Oh, with a perfect plan you play with What you can and run about, run about

Go run about the streets like it's a race Go run about, run about Oh, with a perfect plan you play with What you can
