

Stay

Little Dragon

Ooh, ooh-ooh

Ooh-ooh

Ooh-ooh

Trust that you can't control
The future you'll never know
We're gonna be just fine, baby
No matter how it roll
Or how the endin' go
Leave your armour behind, baby

The deeper into rosy stardust
Further into a boundless night
Lover, I'll be your medicine if you'll be mine
If only for a moment
Hopin' for what love invites
Let's take our time, let's take our time now

Don't spiral down into
Worries that visit you
They gon' depart real soon, baby
Know it's been hard this time
Here we can both unwind
We haven't connected much lately

The deeper into rosy stardust
Further into a boundless night
Lover, I'll be your medicine if you'll be mine (Mine)
If only for a moment
Hopin' for what love invites
Let's take our time, let's take our time now

Daydreams as dark as my fantasy
Stay, please don't go
Wait for me so love won't abandon me
All lonely, lonely
Oh, oh, yeah
Lonely (Oh, yeah)
Lonely (Look)
Don't you dare leave me alone here by myself
When I see you, I see me like a mirror sits on a shelf
In a room with a TV, right over there where your granny slept
Crept up the steps unquietly, I'm aneptin'
Out of breath, I need to save the game I love, I reselect and choose us
Decompressin' from the pressure and the stress that lose trust
Learnin' lessons from the lust your mood ring is luminous
I ain't scared of losin' me, the only loss is losin' us
Talkin', arguin' and fussin'
Fussin', fightin', then we fuck
We fall in and we fall out, but in the end, it's still love
And we don't know how this movie ends until the real (Cut)
Ain't no in between with love, we got it vacuum sealed shut
