

Down In The Gutter

Little Man Tate

I was down in the gutter, nothing but pain
You held my hand, got me feeling again
With a love like no other, that I'd ever known
So let's see how the story unfolds

I stumbled along with a bleeding heart
You bandaged me up, I was falling apart
I said good morning and I made you laugh
So let's see how the story unfolds

It's not always blue skies
Sometimes you can't see through the rain
But when I look into your eyes
I can see clearly again

Now we can look forward to good times I said
They're better when I spend them with you
And wave goodbye to the dark times baby
Your love has got me loving me too, girl
Your love has got me loving me too

I stare at you in the mirror, when you do your hair
I like seeing two of you, in your underwear
I could lay there forever, and hear you sing
So let's see how the story unfolds

We're not one or the other, we're two of the same
With now we're starting again
We're a little bit older, with something to say
So let's see how the story unfolds

It's not always blue skies
Sometimes you can't see through the rain
But when I look into your eyes
I can see clearly again

Now we can look forward to good times I said
They're better when I spend them with you
And wave goodbye to the dark times baby
Your love has got me loving me too, girl
Your love has got me loving me too

I was down in the gutter, numb from the pain
You held my hand, got me feeling again
With a love like no other, that I'd ever known
So let's see how the story unfolds

Now we can look forward to good times I said
They're better when I spend them with you
And wave goodbye to the dark times baby
Your love has got me loving you too, girl

Now we can look forward to good times I said
They're better when I spend them with you
And wave goodbye to the dark times baby
Your love has got me loving me too, girl
Your love has got me loving me too, girl

Your love has got me loving me too
