

# Bones

Little May

There was this boy I fell apart to  
In the backseat of my car to  
And I would listen while he laughed about the things  
That kept us out of bounds too

There was this boy I fell apart to  
In the backseat of my car to  
And I would listen while he laughed about the things  
That kept us out of bounds too

Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?

And there was this girl that made the distance  
And she cracked her wrists while you were listening  
Yes, she felt the fire, she felt it, she felt it  
Deep within your stomach

Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?

Broke back these bones for you  
There's not a lot that I wouldn't do  
Broke back these bones for you  
There's not a lot that I wouldn't do

(My love, you bite my lips, you want this)  
(My love, you bite my lips, you want this)  
(My love, you bite my lips, you want this)  
(My love, you bite my lips, you want this)

Broke back these bones for you  
There's not a lot that I wouldn't do  
Broke back these bones for you  
There's not a lot that I wouldn't do

Broke back these bones for you  
Do you feel in your bones like  
Broke back these bones for you  
Do you feel in your bones like

Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?  
Do you feel it in your bones like I do?
