

They Can See

Little May

The man I loved, he moved in down the road
And I would touch myself in his favourite clothes
He used to love me in the black silk dress, you know
I never knew that he would like him better though

The man I loved, I face him everyday
He takes me down but I want to play
He'd go remind me that I'll never have better, just
Tell him you love it and it'll get better

Hold my mouth to take you higher
Drink from the bottle with a fuel
Tear away after come getting further
Then I'll hop straight into you

The woman I love, she won't let me stay
She's breaking my heart in so many ways
And she used to tell me I look good in red leather
The whip around my neck would make me feel better

Hold my mouth to take you higher
Drink from the bottle with a fuel
Tear away after come getting further
Then I'll hop straight into you

Tear away after come getting further

Hold my mouth to take you higher
Drink from the bottle with a fuel
Tear away after come getting further
Then I'll hop straight into you
