

Competition

Little Mix

Yeah, you're such a gentleman
You always open doors for me
But you see us kind of different
It's accurate, it's have to be
The first one to open his mouth
The last one to throw in the towel
It's time to show your self-out
Boy you're trying

Just a little bit too hard
I thought I told you when we met
That all I get from who you are
But I treat you like an argument
I don't need to speak up my mind
I'm too grown, I'm taking my time
I'm sick of hearing you rhyme
You're some baby

You don't have to come first
Second is okay 'cause it will never be that me

I said it once
You said it twice
You know I like a little competition from time to time
You think I'm wrong
But I know I'm right
You know this ain't no kind of competition
I like a little that vicious
For when you gonna know it's time to let go
'Cause I think I'm about to lose my mind

Tell me does this scare you?
That I'm living my dream
No I don't mean to hurt you
But you make me wanna scream
You smile from grinding your cheeks
You clap stomping your feet
You act about 17
I'm so tired

You don't have to come first
Second is okay 'cause it will never be that me

I said it once
You said it twice
You know I like a little competition from time to time
You think I'm wrong
But I know I'm right
You know this ain't no kind of competition
I like a little that vicious
For when you gonna know it's time to let go
'Cause I think I'm about to lose my mind

I can do it better
You know I can do it better

Why you try to rule?

What is it with you?
Always thinking
I can do it better
You know I can do it better
Baby I guess time
Always argument
Why you wanna fight?
Why you always fight?
You ain't always right
I can do it better every day and every night
I can do it better every day and every night

I said it once
You said it twice
You know I like a little competition from time to time
You think I'm wrong
But I know I'm right
You know this ain't no kind of competition
I like a little that vicious
For when you gonna know it's time to let go
'Cause I think I'm about to lose my mind
