

Nothing But My Feelings

Little Mix

I'm laying here in nothing but my feelings
Thinkin' 'bout our shadows on the ceiling
Waiting for you
So you should probably come through
If you know what's good for you

I know we will never work out
But if you're looking for a work out
You should come 'round, come 'round baby
You ain't even gotta worry
'Cause ain't no strings up on my body
I ain't tied down, tied down

'Cause I want you, I told ya, told ya
You're my mood
Come over now

I'm laying here in nothing but my feelings
Plus some diamonds dripping from my earrings
Waiting for you
So you should probably come through
I'm laying here in nothing but my feelings
Thinking 'bout our shadows on the ceiling
Waiting for you
So you should probably come through if you know what's good for you

You should come and see me
In nothing but my feelings
You should come and see me
If you know what's good for you

Kinda tipsy but I'll wait up
And I ain't taking off my make-up
Till you take me down, take me down

'Cause I want you, I told ya, told ya
You're my mood
I'll show you tonight

I'm laying here in nothing but my feelings
Plus some diamonds dripping from my earrings
Waiting for you
So you should probably come through
I'm laying here in nothing but my feelings
Thinking 'bout our shadows on the ceiling
Waiting for you
So you should probably come through if you know what's good for you
You should come and see me
In nothing but my feelings
You should come and see me
If you know what's good for you
You should come and see me
In nothing but my feelings
You should come and see me
If you know what's good for you
