What you know about reems, chuck20 n the josh arce
Never blaspheme in the eyes of God
We the young gods you know you won't be saved
Never been another escape
Damn right so the music got my soul engraved
They can never drive me insane
I leave everybody in agony
If love is pain
I been up too late
Tyrin to figure out a iller strategy of how I'm gonna switch up the game
Who I became
Is a better version of my anatomy some people tellin me give up the name
Never no way
This that shit you zone to this that shit you blow to
Up up away
This that shit you know fool this that shit that's cold
You can bring anybody my scene's involved
If there's an issue then we can get that solved
Nothing but chill bitches over here
Like jade and jasmine if sienna's in vogue
This that late night rantin
Everybody feelin inspired in the studio
Space age we the baddest oh

You need a mate, mate

If you ever wanna step up, add pressure to the same game

That u lames play

Cause you play lame

I make places and faces better
Sometimes I like to sit down
And just [?] by the fact that I can't get better
Let's get it
I'm a king to a peasant and a crown to a king
I'm not crowning the prince, cause the crown is the king's
Make your crown disappear, if you're clowning with death
If the clown wants the crown, then it's off with your head

I kill em twice cause I'm meant to do it
My execution is execution
Guillotine lay your head to rest
Space cut you out
That's how you do it

I'd hope you respect the space
Anybody in the atmosphere
