Little Simz

I put my life into what I make and enjoy the fruits of my labour
It's not in my favour to favour what you make
Take my time to invest into what will take me to greatness
I won't stop 'til only my music's up in your playlist
Even then I'll still kill 'em I'll still unlock what is hidden
I'll still be put up for awards and win 'em
I'll still make the most of my time, here on planet earth
Still smile at the people, that want me to disperse
See I've been tryna tell the listeners know all your worth
They will get you to conform but pull you in first
Like...

Going round and round I go
Said they will get you to conform but they'll pull you in first

If you live in life well, you decide but pay the price that you owe
Going round and round I go
On the search to find that road
If you live in life well, you decide but pay the price that you owe
Going round and round I go
Can you show me my way home?
Going round and round I go
Going round and round I go
Going round and round I go
Going round and round I go
Going

Oh damn it's a movie
See the room is spinning this drink must be going through me
See me looking fly hella wavy actin' Bougie
Had a look at all that I achieved then it threw me
Simz you come a long damn way to salute me
Figured I'd be better at writing songs
Than working in retail but that's just how I feel
Shit is getting real
Made a plan that didn't work, so I free styled it
Everything that what you see has been free styling
Could the best things happen unplanned?
If you read between the lines you should absorb what you can
I been lookin' at my feet and working out where I stand
Make a mark for what it's worth and I believe that I can
You feel me?
Goin' round, how do you know when to stop?
You see the cycle just repeats
Be mindful when you look into the Bible what's it preach?
Still got my faith and nobody can take that from me
Never

Going round and round I go (round and round, round and round)
Going round and round I go
Sing to me like

If you live in life well, you decide but pay the price that you owe
Going round and round I go
On the search to find that road
If you live in life well, you decide but pay the price that you owe
Going round and round I go
Can you show me my way home?

Going round and round I go
(The world is an oyster and it's mine it's mine)
Going round and round I go
(Get your hands in the sky if you're ready to vibe)
Going round and round I go
(Head to the stars we could get lost in the night)
Going round and round I go
Going, going
