

## Closer

Little Simz

Oh

Look, you are special and you know it  
Came to me when we were young and immature  
Now we've grown to get each other this feeling's pure  
Never got why we was hiding our feelings for  
Guess it weren't the right time it's a miracle  
Who would thought we would end up like this  
Your energy and my energy's compatible so why are we trying to  
fight this  
Now I know that it's a delicate situation  
Tryna be clear so its not mistaken  
No I love you mum I know she see something between us  
I just wanna do me, do you, we could be us  
This ain't the place for everybody to see us  
Only time will measure we don't need nobodies pressure  
No it ain't a rush and I believe in that  
I see it happening and I know you see it too but

Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe

I feel like I know what's real  
What I had with him weren't real  
He missed out, and I grew wiser  
But it's you that makes me smile  
Boy don't you know that our minds are on the same page  
Our lives depend on our fate  
We try to make it okay  
But realize we feel the same pain  
Came to the conclusion I ain't ready to be losing you  
How can we assume that this is all a big illusion  
You don't need to say it I can see it its been proven  
We can all go with the flow  
Ain't seen you in a minute what's been good you know I miss ya  
Maybe we should catch up over dinner and some liquor  
[?] conversations all I needed from ya  
Talk to me we'll pour up another glass or two  
But I still...

Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe  
Can't wait till you get closer to me babe
