

# Desire

Little Simz

Desiring everything, what is limits?  
Pusher be on the sky when you pushing me to the limits  
Oh, Jame Blake, I'm overgrown  
This love's been over shown  
And these tears won't overflow  
When that system overload  
That's crashing all up in your memory  
Desire has never been a friend of mine  
However, it's never been a enemy  
I'm just applying these different energies  
And putting it out to the world, the universe  
And imma focus on it steadily  
Why will I spy to go dap my own desire?  
Whatever you acquire, obviously in my empire  
In my space trackies, that's just my normal attire  
If I lit the candle, I must've started the fire

And now I never listen to your music or a lie  
My fort is real, better call me sire  
Nigga, I'm up there (up there)  
And I come like  
Joker out at that dark night  
You're Monsters Inc. and I'm Freddy Kruger  
That's real screams when it's bedtime, nigga!

You will never wore me down down down  
Down to the bottom of the bottomless pit  
Got the dumb thinking, "What the bottomless is?"  
We fill bottomless drink  
We heal souls, none of that ah rotten and stink  
Wrapped up, cotton and link  
You stare too much of what I'm saying  
Boy is you, then blink

An inclination to want things  
A set of longing for a person or an object  
And hoping for an outcome but a preferred outcome  
For your choice

Gimme everything I can imagine  
I don't care how t's done just make it happen  
A sense of humanity I've been lacking  
If the outcome's income I'll be happy  
But is that happiness?
