

Brother

Live

We got a little house
Upon a little hill
When life is just too much
We take that little pill
The music's in our blood
And we ain't gonna change
We don't give a fuck now
We're dancing on the rings of flame

There's a hopeless cloud covering up the sun today
There's a rider on the road, and he's blocking our way now

Find a way to walk with me, brother
And we'll head out on a journey that has no end
No end, child
Find a way to sing with me, brother
And the light'll turn you right into my friend
Ah yeah!

My Siamese twin is Pete
And he's a crazy man
He's dancin' all alone
Yet he's surrounding me
These fools will never know
How deep this river is
Cause they were all up on
The beach that doesn't have no end

There's a hopeless cloud covering up the sun today
There's a rider on the road, and he's blocking our way now

Find a way to walk with me, brother
And we'll head out on a journey that has no end
No end, child
Find a way to sing with me, brother
And the light'll turn you right into my friend
Ah yeah!

The city's a place
With vision and class
A fly on the wall
A blast from the past
Where I made a pact
With my deepest soul
And the risin' Sun...

Find a way to walk with me, brother
And we'll head out on a journey that has no end
No end, child
Find a way to sing with me, brother
And the light'll turn you right into my friend
Ah yeah!
