Do what you want to do, Say what you want to say to me I know what you'd like To think of me This is not real it can't be real This thing I feel You're threatening You're threatening How can I not hate you, hate you How can I not be free, be free I know deep down inside How God reveals himself I know deep down inside To know him I must kill pride Why do you care so much for me, What's in this for you Why can't selfishness rule you Like everybody else Let go pride, let go pride, Cannot deny, cannot deny This thing I feel, I feel inside How God reveals himself I know deep down inside To know him I must kill pride
