

# Post Millennium Extinction Blues

## Living Things

Vacination has killed the nation  
And we are all decaying into our own pollution  
We are gonna watch the two step into our next invasion  
Ain't cliché, darlin', to say you want a revolution

Survival  
Survival  
Survival  
Who will survive?

We watch the world breaking down

Who will survive these times?

The country is aching for the next sensation  
If we have to sweep the bullshit, tell me why the fakin'  
It is just money makin', I guess the times are changin'  
If we don't need why the man tell us the world is breaking

Extinction
