

# When We're Fire

Lo-Fang

Wake up  
I've been trying to make your pain stop  
This is not just entertainment  
I've been trying to let you know

Lately  
Nothing has been coming easy  
Only nocturnal blue movies  
Pink kimono on the floor

Even when you won't believe me  
Try to make it easy, easy

Even when we're fire  
Even then you never loved  
You never loved  
Even when we're fire  
Even then you never loved  
You never loved

Distress  
From the past or from my weakness  
I can take you through the darkness  
I can help you let it go

Damage  
Why the fuck did you just say that  
I'm a person not a concept  
Work it out or let me go

Even when you won't believe me  
Try to make it easy, easy

Even when we're fire  
Even then you never loved  
You never loved  
Even when we're fire  
Even then you never loved  
You never loved

Oh, you never know  
Oh, you never know  
You never know

Even when we're fire  
Even then you never loved  
You never loved  
Even when we're fire  
Even then you never loved  
You never loved
