

Just In Case

Loïc Nottet

I gave you my number, just in case
I gave you flowers, just in case
I was in love and now I'm gonna die
I've lost a fight and now I'm gonna fly
And I won't love, won't be loved
Won't be drunk in love, just too drunk all day
You got my heart, I'm gonna fall

And are you alone?
How you feel?
Will you be gone long?
Can you hear what's in my head?
My mind's gonna be heard

I run on the road away from light
I catch my face
I wake up my dark side
It's been yesterday and by the next day
It's enough I stopped you
Try to give me your life
I turn the pages, leave my past
Today is the day is the only way
To burn my pain
Shoot the light and try to sleep well

I left your flowers by, just in case
I said you goodbye, just in case
In case, in case you could listen

I run on the road away from lies
I burn my face
I wake up my dark side
It's been yesterday and by the next day
It's enough I stopped you
Try to give me your life
I turn the pages, leave my past
Today is the day is the only way
To burn my pain
Shoot the light, yesterday is gone
Tomorrow will go
I've been shout out my shame

Anywhere I go
I just wanna go
I just wanna blow
Last kiss to you
You're the reason I'm alive
