

# Whiskey Problem

Logan Michael

It'd be nice if I could light up a cigarette  
Take a drag and just forget  
And let her go up in smoke  
And crack a top on some ice-cold  
Drop a needle on some George Jones  
Or get lost on some old backroad

Well, that usually does it  
But this time, it ain't gonna cut it

That girl's a whiskey problem  
The only way I know to get her gone  
Is leaning on the bottle  
And hoping that her memory ain't as strong  
So I'll pour another glass 'til I don't want her back  
'Til I'm too damn drunk to know I'm at the bottom  
That girl's a whiskey problem

Well, I don't know how long this is gonna take  
But hell, at this rate  
This place gon' run out of drinks to pour  
And no matter how you mix it  
Sober ain't gon' fix it  
And if I know one thing for sure

That girl's a whiskey problem  
The only way I know to get her gone  
Is leaning on the bottle  
And hoping that her memory ain't as strong  
So I'll pour another glass 'til I don't want her back  
Until I'm too damn drunk to know I'm at the bottom  
That girl's a whiskey problem

(That girl's a whiskey problem)

Now I'm seeing double and the bar's about to close  
The trouble is I don't know if I got enough back home

For this whiskey problem  
The only way I know to get her gone  
Is leaning on the bottle  
And hoping that her memory ain't as strong  
So I'll pour another glass 'til I don't want her back  
'Til I'm too damn drunk to know I'm at the bottom  
That girl's a whiskey problem

That girl's a whiskey problem
