All This Night Needs

Logan Mize

Purple sky, summer breeze
Steam rising through the southern trees
It's too hot to think about sleep
But that don't stop me dreaming
I'm wide awake
Are you awake?

All this night needs now is you (just look at that)
Big moon rising right on cue (just think about)
All the crazy we could do yeah just like me
All this night needs now is you

Got a mustang 65
I could show you how to make it fly
We could just leave it parked in your drive
We could keep the engine runnin'
In case you change your mind
Change your mind

All this night needs now is you (just look at that)
Big moon rising right on cue (just think about)
All the crazy we could do yeah just like me
All this night needs now is you

So close
Almost perfect
So close

All this night needs now is you (just look at that)
Big moon rising right on cue (just think about)
All the crazy we could do yeah just like me
All this night needs now is you

All this night needs now is you (just look at that)
Big moon rising right on cue (just think about)
All the crazy we could do yeah just like me
All this night needs now is you

Just like me is you
