

Figure It Out

Logic

I thought I knew you, baby
I thought I knew what this was all about
I thought you were my lady
But you don't love me lately

Let's figure it out, let's figure it out

I thought you were the one for me
But it would seem it's all just necessity
I've been thinkin' 'bout this for some times
When I was yours and you were mine

Let's figure it out, I'm tryna figure it out

All I wanna do is embrace
But I can tell by the look on your face, we're not in a good place
Let's have a glass of wine or a case
I'ma go buy you a vase, whatever it takes

Let's figure it out, I'm tryna figure it out

Subtract all the nonsense, multiply the romance
I don't want no division, I just want another slow dance
You gon' tell me what you think you want
But I'ma tell you what you really need
The only way we finna succeed

Is if we figure it out, we gotta figure it out
I wanna figure it out, think we can figure it out
