

## Summer

Londonbeat

Change will come, I know it will  
It's written in the sky  
Oh, I love you more than words can say  
Through the night to the cold light of day

In love and reason  
Never too late to change  
Like a change of season  
Never too late, too late, too late

Summer, love is everywhere  
Nights are young, we're caught up in the magic  
Summer, wouldn't it be a shame  
If September let me in the rain

When no change will come, we can't deny  
The many reasons why  
Whoa but stumbling blocks, they're just stepping stones  
As we wave the past goodbye

In love and reason  
Never too late to change  
Like a change of season  
Never too late, too late, too late

Summer, love is everywhere  
Nights are young, we're caught up in the magic  
Summer, wouldn't it be a shame  
If September let me in the rain

Every single night  
Every single day  
Every single night  
Little bit of summer  
Every single night  
Every single day  
Every night, every day, every night

Summer, love is everywhere  
Nights are young, we're caught up in the magic  
Summer, wouldn't it be a shame  
If September let me in the rain
