

Fire Eternal

Lord Huron

Show me where you go to say your prayers
Tell me when I can see you again
Show me how you're living in the now
Tell me why you're crying

I wanna quit you, but it's like a disease
I remember what your body said, you do as you please
Can you come over? I am down on my knees
And I'm waiting for you, baby, waiting for you

What can I do? I will always be in love with you
What can I say? It can never be another way
One day, you'll see, you will always be a part of me
Till the end of time, our fire eternal

Our love is endless, it can never be undone
Wild as the desert wind, and hot as the sun
Why fight the flames? Let's let 'em burn until we're ash
I laid the fire, but it was you who lit the match

I want to quit you, but it's like a disease
How your memory lives inside me, how you trouble my dreams
You say it's over, but that's not what you mean
I'll be waiting for you, baby, waiting for you

What can I do? I will always be in love with you
What can I say? It can never be another way
One day you'll see, you will always be a part of me
Until the end of time, our fire eternal
