

When the Night is Over

Lord Huron

My one and only love
I've been lonely long enough
Will I find you when the night is over?
Tell me where did you go?
I've been searching high and low
I have only 'til the night is over

In every window, I pass
Your reflection in the glass
Makes me wonder if my mind is going
Shadows shifting in the rain
Slowly driving me insane
By the stars above, I know we were in love
I have only 'til the night is over

I feel the weather change
I hear the river say your name
I watch the birds fly by
I see an emerald in the sky

Now the trail has gone cold
I don't know where else to go
And my time, I fear, is nearly over
When the ocean drinks the sky
And the city winks its eye
When the night is done, you'll vanish in the sun
Will I hold you when the night is over?

Am I lost inside my mind?
There's an emerald in the sky

I hear the river say your name
By the stars above, I know we were in love
I hear the river say your name
I have only 'til the night is over
