

And It Was Night

Lord Of The Lost

Into the dusk you stray
In search of an escape
A thief in need of grace

No soul is immune to
The melancholic moon
And nature's tranquil tune

I want to feel
That reason's real
And face the profane
For faith to remain
So daemons be clear
That we know the fear
The truth is riding tonight

In peace we kill the lights
And it was darkness
And it was night
We dream with open eyes
And it was darkness
And it was night

Beneath the lustred stars
Discover who we are
In other's tainted hearts

The mysteries enthrall
As distant wisdoms call
To echo through us all

In peace we kill the lights
And it was darkness
And it was night
We dream with open eyes
And it was darkness
And it was night

I want to feel
That reason's real
And face the profane
For faith to remain
So daemons be clear
That we know the fear
The truth is riding tonight

In peace we kill the lights
And it was darkness
And it was night
We dream with open eyes
And it was darkness
And it was night
And it was night

No soul is immune to
The melancholic moon
But fate has come too soon

And it was night
