

Crimson Masque

Lord Of The Lost

Oh

Another day, a different night
This is the face that I need to survive

You assume you know what you're gonna see
From some of the moves I've made in the past
There's more to my story than you care to know
So sit back and enjoy the show

While I wear this crimson masque (I'm bending the rules)
I'm bending the rules (Who's keeping score?)
Like never before (Is there something that you're needing me for)

Get off your knees (Get off your knees)
Take up your sword (Take up your sword)
Just let me in (Let me in)
We're ready for war

Another day, a different time
Is it something that I needed to find?
Another day, a different night
This is the face that I need to survive

So take up your sword (I'm bending the rules)
And get ready for war (Who's keeping score?)
I'm bending the rules, I'm changing the game, I'll run up the score (I played a)

I played a fool
Who's keeping score?
Is there something that you're needing me for

Get off your knees
Take up your sword
Just let me in
We're ready for war
Get off your knees
Take up your sword
Just let me in
We're ready for war

Another day, a different time
Is it something that I needed to find?
Another day, a different night
This is the face that I need to survive
Need to survive

Take up your sword
Ready for war

Just let me in and you'll see

Another day, a different night
This is the face that I need to survive
Another day, a different time
Is it something that I needed to find?

Another day, a different night
This is the face that I need to survive
Get off of your knees
Take up your sword
Just let me in
We're ready for war

I need to survive
