

The Last Star

Lord Of The Lost

Deep within the realms of space
Oblivion awaits
For all your fatal beauty
But who cries for you
In this void of solitude

Go, leave no trace
Go!

The last star
Far out there in the cold
The last star
Afar, so lone and old

The last star
Far out there in the cold
The last star
Afar, so lone and old

You are the last star

Come the midst of nothingness
The only matter left
Of all that life had hoped for
Will fade on this day
One final victim of fate

The last star
Far out there in the cold
The last star
Afar, so lone and old

You are the last star

No tomorrow, nothing left today

The last star
A zillion years have passed
The last star
You know there's hope at last
The last star
Your light fades in a bolt
The last star
Tonight you die alone

The last star
Far out there in the cold
The last star
Afar, so lone and old

You are the last star
You are the last star
The last star
