

Monster Is My Name

Lordi

Who the hell d'ya think you are you fuckface !

You don't know shit
About nothing you say
I'm the electric dinosaur
I'm a walking wonder, yeah
You see my face is pretty
And my voice is thunder
Prepare yourself
To get ripped asunder
You thought that
You'd get smart with me

You know me, my name is monster
Now don't you call my name in vain
You know my name and what it stands for
For monster is my name
You know me my name is monster
I'll never let you get away
You know my name and where it comes from
For monster is my name
For monster is my name

You know what, I think you love me
You say you hate my guts
But I see what I see
If you could be me
You'd never change back, no
Cause I'm fucking awesome
And I know that it's good to be me
Now isn't that a fun fact
My one true love is me, me, me

My name is monster
And you know what I'm about
And when you see me
All you want to do is shout
My name is monster
And I'm here for you
I am your monster
Let me play with you
