Breaking Robot

Baby you know that I told you that I'm done with you There's no need to cry tears only drown you slowly Baby you know that I told you a million times to let me be Baby you know 'cause I, I told you to set me free

The more I try, the more I die The more we lie, the more we cry

Why we are staying, staying, staying (3x) Paving the way to your heart But we're always gonna break it

Take me away from here this madness is too much for me Was I a certanty I told you to set me free

The more I try, the more I die The more we lie, the more we cry

Why we are staying, staying, staying (3x) Paving the way to your heart But we're always gonna break it

When it's closed and blue And the heart has just turned cold It's all set and done When the love has turned to stone It's all set and done 'Cause we just can't love no more

'Cause the more we lie, the more we cry, we cry, we cry, we cry

The more I try, the more I die The more we lie, the more we cry

Why we are staying, staying, staying (3x) Paving the way to your heart But we're always gonna break it
