

Gravity

Loreen

Pull me out
Don't leave me on my own
I would never run away, run away
Take me down
I follow where you go
Pick me up from outer space

Ooh, your gravity, your gravity, your gravity
I will follow you
Ooh, your gravity, your gravity, your gravity
I will follow you

Oh, I will follow you
Oh, I will follow you
I will follow you, yeah
I will follow you, yeah
I will follow you, yeah

In the stars
I see you everywhere
I could never get away, get away
In a hold
Just take me anywhere
I believe in what you say

Ooh, your gravity, your gravity, your gravity
I will follow you
Ooh, your gravity, your gravity, your gravity
I will follow you

Oh, I will follow you
Oh, I will follow you
I will follow you, yeah
I will follow you, yeah

Baby, I will follow you
I'll follow you
I'll follow you anywhere
Baby, I will follow you
I'll follow you
I'll follow you anywhere
