# Alone

**Loren Gray**

Your name in my mouth come out in cursive
Red hearts round the letters on my mind
The world could be on fire, wouldn't notice
I'm too busy sinking in your eyes

Then seconds turn to hours and I can't get enough
Whenever you're here I lose track of time

I really like being alone with you
No issue
All on my own with you
I don't need nobody but you
I really like being alone with you
Home with you
That way I don't miss you
I could live alone in this room

Alone, alone, alone, alone
With you
With you
Alone, alone, alone, alone
With you
With you

I'm done picking petals off of roses
You're the only one I wanna grow
Oh I wish I could love you in slow motion
That way I don't gotta let you go

So baby let's go into hiding, I'm not afraid of the dark
I don't need nothing as long as I am where you are

I really like being alone with you
No issue
All on my own with you
I don't need nobody but you
I really like being alone with you
Home with you
That way I don't miss you
I could live alone in this room

Alone, alone, alone, alone
With you
With you
Alone, alone, alone, alone
With you
With you

(Alone, alone, alone, alone)
(Alone, alone, alone, alone)
