

Everything it Takes

Loretta Lynn

I love you more than she ever will
But the only way she can get a man is steal
I don't know if I should tell you this or not
She's got everything it takes to take everything you've got

And when she takes you she's takin' everything that I've got to
o
She's had a million old flames, so to her you're nothing new
She's cold as ice, but you still think she's hot
She's got everything it takes to take everything you've got

She turned you on and then you turned on me
I'm more of a women than she'll ever be
To me she ain't nothin', but to her that's a lot
She's got everything it takes to take everything you've got

And when she takes you she's takin' everything that I've got to
o
She's had a million old flames, so to her you're nothing new
She's cold as ice, but you still think she's hot
She's got everything it takes to take everything you've got
She's got everything it takes to take everything you've got
