

# **Darkest Spawn**

**Lorna Shore**

I watch them slither through their lives with a knife in their hands  
While the blade in their own back  
They still can't fucking understand

Deceivers amongst themselves  
Rotating their own vale closer to its eradication  
The spineless serpents sink their teeth into the skin of the ones they betrayed who bit back for revenge  
The cycle never ends  
Betrayers portraying false degrading  
Straight for the throat

I watch a world turn cold  
This is the end of times  
This is the darkest spawn

Creatures of this land formulating their extermination  
Bastards of the damned abandoning  
Their own creation  
Faithless misery  
Turning their backs on their own families

I watch a world turn cold  
This is the end of times  
This is the darkest spawn  
None of us are fucking safe, in a sick world full of snakes  
This is the the end of times, this is the darkest spawn

I watch them slither through their lives with a knife in their hands  
While the blade in their own back, they still can't fucking understand

Spineless cowards, feeble fucks  
Let the blades that they've used to betray  
Turn on themselves and dig into their throats  
Splice down the chest, expose their insides  
Take in what you have given  
Swallow this blade
