

# The Astral Wake of Time

Lorna Shore

Dead I drift amongst the stars  
Lost in the astral wake of times  
Limitless as I may seem  
Endless memories haunt my dreams  
Where is the part where close my eyes for good  
I denounce this fucking life  
Let me close my eyes for good

I can't believe I swore my soul to the dark force unknown  
If I could take it back today  
I'd slice upon my fucking throat if that's what I had to give  
Is this destiny, is this destiny  
My tongue has gotten the fucking best of me  
I pray for a chance to be one with the universe  
I wish to become one with darkness

One with the darkness one with the universe  
One with the darkness, in the heart of the universe  
Eternal

Dead I drift amongst the stars  
Lost in the astral wake of times  
Limitless as I may seem  
Endless memories haunt my dreams  
Where is the part where close my eyes for good  
I denounce this fucking life  
Let me close my eyes for good

In the shadow of the light  
A microscopic cosmic blight  
Bearer of humanity  
Traveler of realities

Wandering beneath the seams  
A ghost to the universe  
Transcending realities

One with the darkness one with the universe  
One with the darkness in the heart of the universe  
Eternal

In the shadow of the ever growing light

I can't believe I swore my soul to the dark force unknown  
If I could take it back today  
I'd slice upon my fucking throat if that's what I had to give  
Is this destiny, is this destiny  
My tongue has gotten the fucking best of me  
I pray for a chance to be one with the universe  
I wish to become one with darkness

One with the darkness  
I wish to become one with the darkness  
Where is the part where I close my eyes for good  
I denounce this fucking life  
Let me close my eyes for good
