

Gone

Lost Frequencies

When I'm gone
You still lead my songs
'Cause I still need you when I'm gone
You safe in my mind
'Cause I still need you I—

Well, it'll definitely hurt me to go
You always hit it with the words that is so
Hope you never let your life get too low
'Cause I still need you I—

You never want your demons to show
Better run it from a fear that you know
Hope you never let your life get too low
'Cause I still need you I—, need you I—, need you I—, need you I—

I still need you I—(need you I—, need you I—)
When I'm gone
I still need you I—(need you I—, need you I—)
When I'm—

Away, away I'm hoping
Don't let your patience fall back
This show, I shocking know
Took all the love I know
I stayed and prayed for all that
I stayed with souls that knew that
Through every night alone
For every scar that showed

You know I'm not into giving time
You know I hate to have to say goodbye
Because I couldn't even catch the sky
Hope I don't forget that night

When I'm gone
You still lead my songs
'Cause I still need you, I'm gone
You safe in my mind
'Cause I still need you I—

Well, it'll definitely hurt me to go
You always hit it with the words that is so
Hope you never let your life get too low
'Cause I still need you I—

You never want your demons to show
Better run it from a fear that you know
Hope you never let your life get too low
'Cause I still need you I—

Gone
I still need you I—(need you I—, need you I—)
When I'm gone
I still need you I—
'Cause I need you I—

Oh, oh, oh
'Cause I need you I-
Oh, oh
But I still need you I-
Say it's in my-
You say it's in my mind
But I still need you I-
Say it's in my-
You say it's in my mind

When I'm gone
You still lead my songs
'Cause I still need you
I'm gone
You safe in my mind
'Cause I still need you I-

Well, it'll definitely hurt me to go
You always hit it with the words that is so
Hope you never let your life get too low
'Cause I still need you I-

Well, you never want your demons to show
Better run it from a fear that you know
Hope you never let your life get too low
'Cause I still need you I-
