

# I Want To Hear It From You

Lou Rawls

I want to hear it from you  
I want to hear it from one who should know how it is  
All the second-hand words seem to get in my way  
I want to hear it from you

I want to hear it again  
I want to know if the soft scented touch of your lips  
Must be taken away like a mother's first kiss  
To the life that she gives  
I want to hear it from you  
I've got to hear it from you

I've got a right to get it straight from you  
To give my life a different point of view  
To find a way, baby, to keep from losing you  
Keep from losing you  
I gotta keep from losing you  
Baby, baby, I don't want to lose you

If you don't know what to say  
Hey baby, to understand is my life and the question is why  
You should cry in the night while your eyes look away  
Every time that I speak and there's nothing to say  
Hey baby, I've got to hear it from you

I've got to hear it from you  
I want to hear it from you  
Let me know how you feel  
Well, you've got to make up your mind  
Tell me where I can run  
When the roof tumbles in?  
I want to hear it from you

I want to hear it from you  
I want to hear it from you  
I want to hear it from you  
I want to hear it from you
