

# Gravity

Lou Reed

Gravity is always pulling us down  
Gravity is always pullin' us down  
Gravity is always pullin' us down  
Pullin' us down, pullin' us down

Gravity makes you lower than this  
What could make you lower than this?  
Gravity pulls you lower than this  
Lower than this, lower than this  
What could you do, and what could you say?  
What could you do, and what could you say?  
What could you do, and what could you say?  
It's gravity, gravity

[?] in the garden behind the wall  
There's no protection, at all  
Listen to the screaming and listen to them holler  
Gravity, gravity  
See the love... or squalor

Gravity, gravity  
A law of nature, gravity  
Gravity, oh gravity  
There's nothing lower than gravity  
Pull to the left. Pull to the right  
Gravity, all day, all night  
Some kill this, and some rape that  
And some are... somehow worse than that

Gravity, zoom zoom zoom  
Gravity keeps us from the moon  
From the stars, down to the earth  
Gravity is what it's worth  
War, war  
You can't get enough of war  
War, war  
You can't get enough of war  
War, war, war, war  
All our lives, that's all we saw

Gravity  
War, war, war, war  
Our true God's the god of war  
Gravity just pullin' us down  
Gravity just pullin' us down  
Gravity just pullin' us down  
Gravity, gravity  
You can't get away from gravity  
Gravity, gravity  
You can't get away from gravity
