

Next To You

Loud Luxury

Friday night, let me take you out
Show downtown what it's all about
Something kind of like we use to do
Break out the heels, break out the dress
As beautiful as when we first met
I wonder why I fell so hard for you

Gonna love you so right
Girl, let's do what shadows do in the night
Let's get lost in the sheets
Yeah, you know just what you're doing to me

Don't you know that I, I love waking up next to you
Waking up next to you
Spend my whole life in love, waking up next to you
Waking up next to you
Waking up next to you
Waking up next to you
Spend my whole life in love, waking up next to you
Waking up next to you

Your pj's on, and your hair's a mess
It's a side of you that I love the best
Ain't no other place I'd rather be
And kiss those lips, and hold your hand
I wouldn't trade places with Superman
Yeah, I'm on top of the world when you're next to me

Gonna love you so right
Girl, let's do what shadows do in the night
Let's get lost in the sheets
Yeah, you know just what you're doing to me

Don't you know that I, I love waking up next to you
Waking up next to you
Spend my whole life in love, waking up next to you
Waking up next to you
Waking up next to you
Waking up next to you
Spend my whole life in love, waking up next to you
Waking up next to you

Don't you know that I, I love waking up next to you
Waking up next to you
Spend my whole life in love, waking up next to you
Waking up next to you
Waking up next to you
Waking up next to you
Waking up next to you
