

The Best That You Bring

Louise

Another night goes by
Far away from the crowd
We're wrapped up in our love
Don't even hear a sound
I'm here for you
You're for me
And baby that's all I need

People in this world
Want material things
Always searching for more
But what does it bring
An empty place inside
And nothing emotionally

I want your love
I know that's good enough for me

I don't need diamond skies
They just cloud my mind
All I want is the best that you bring
These big city lights
They don't fill me inside
All I want is the best that you bring

I spent so much time
Walking down these roads
Been searching outside
For some tender love
But what did I find
It was always here before my eyes

Time can reveal
All of the things we never see
I don't need diamond skies
They just cloud my mind
All I want is the best that you bring
These big city lights
They don't fill me inside
All I want is the best that you bring

I'm not looking for perfection
Just someone who can fill me inside
When you're looking in my direction
That's all the riches I need in life

These big city lights
They don't fill me inside
All I want is the best that you bring

I don't need diamond skies
They just cloud my mind
All I want is the best that you bring
These big city lights
They don't fill me inside
All I want is the best that you bring
