

Death of Us

Love and Death

Cradling
My curse I've lost everything
Your words they keep stalking me
Without you it's hard to see
The need to move on

Wish I could live in your memory
Finding the fatal flaws
Looks as though they were meant for me
No effect without a cause

Running on borrowed time
There's nothing left of us
But betrayal
Looking for a sign
To guide the rest of us
The death of us

The way to find
That piece of my heart
You can take me in
No consolation prize
Why did you feed the fire
Don't have to look far to find me

I hate you, I miss you
I can't believe
I hate that I lost you
My everything
I wish that I could bring you back to me
Somehow I guess I gotta
Move on

Do I deserve any sympathy
Concerning your lack of applause
Was it all fate was it meant for us
No effect without a cause

Running on borrowed time
There's nothing left of us
But betrayal
Looking for a sign
To guide the rest of us
The death of us

The way to find
That piece of my heart
You can take me in
No consolation prize
Why did you feed the fire
Don't have to look far to find me

Let me go let me go
I can't live another day
Let me go let me go
I can't live another day (With you)
Trust you, no

Time to go
Let me go, let me go
I can't live another day (With you)

Running on borrowed time
There's nothing left of us
But betrayal
Looking for a sign
To guide the rest of us
The death of us

The way to find
That piece of my heart
You can take me in
No consolation prize
Why did you feed the fire
Don't have to look far to find me
