

Black Wave

Lovedrug

Sad song, I kinda hate the blues
But anyway
Strung along I didn't love you anymore
But anyway

I'd like to have a conversation
With my younger self and say, black wave

I'd like to have a conversation
With my younger self and say, black wave

I'd like to have the inclination
That I might float away, black wave

I'd like to have a conversation
With my younger self and say, black wave

Black wave

What's it mean?
I think you'd find it kinda
Hard to understand
Dark times are kinda funny
If you learn to laugh at the ride, yeah

I'd like to have a conversation
With my younger self and say, black wave

I'd like to have a conversation
With my younger self and say, black wave

I'd like to have the inclination
That I might float away, black wave

I'd like to have a conversation
With my younger self and say, black wave

Black wave

Black wave
