

# Ladders

Lovedrug

Hello the sun  
And all this glory  
The radios on  
It's playing your favorite song  
I wish you hadn't died last night  
I cannot bring you back  
So can I come alone  
This age is carousel  
I remember all the voices  
I forget all of their names  
Your stage was full of lies  
Took the costumes out the basement  
And you brought them all to life  
Hello the sun  
And all this glory  
The radios on  
It's playing your favorite song  
I wish you hadn't died last night  
I cannot bring you back  
So can I come alone  
From these ladders that  
Your climbing on  
Ill build your diamond ring  
From the ashes of the pavement  
That wound up to your house  
Hello the sun  
And all this glory  
The radios on  
It's playing your favorite song  
I wish you hadn't died last night  
I cannot bring you back  
So can I come alone  
I cannot bring you back  
From these ladders  
That you're climbing on  
This is ok look down  
I'm in the apple orchard  
That we found  
Back in the fall  
Baby your right at night  
I'm wrecked without you  
Keeping me so warm  
I did it before  
Hello the sun  
And all this glory  
The radios on  
It's playing your favorite song  
I wish you hadn't died last night  
I cannot bring you back  
So can I come alone  
I cannot bring you back  
From these ladders  
That you're climbing on
