I wake up the same story I hear you at the door I see my medication Will cut you on the floor A fever you're shaking And boozing on the shores A nightmare like a devil But still I love you more She's disaster, she's disaster She's a caution a warning sign She's disaster I'm begging four thirty Please put your clothes back on There's doctors in the dining room Who came to fix what's wrong Your cracking, I'm sorry There's nothing can be done Your dancing round on life support With matches and a gun She's disaster, she's disaster She's a caution a warning sign She's disaster No more speaking you need cooling Let me hold you now You're a nuclear, Followed beauty No one can hold you down She's disaster, she's disaster She's a caution a warning sign She's disaster She's disaster, she's disaster She's a caution a warning sign She's disaster
