

Undertow

Lovehammers

On and on and on
Beating in my chest
Are you the chosen one
Pass my test
And I breathe deeply as you walk slow
And I know you are the only...

Take you down, take you slow
Stand together, watch the river flow
The water is freezing skipping stones
Realize you are the only only only one

I wanna take you down
But it seems you've already gone
Time changes you and me
Can't breathe in the undertow
In the undertow

Inside a world turned upside down
One last breath before we drown
And I know I won't die alone
Understand you are the only one

I wanna take you down
But it seems you've already gone
Time changes you and me
Can't breathe in the undertow
I wanna take you down
But it seems you've already gone
Undertow

Undertow, undertow, would not let my lover go
Undertow, undertow, would not let my lover go

I wanna take you down
But it seems you've already gone
Time changes you and me
Can't breathe in the undertow
I wanna take you down
But it seems you've already gone
Undertow

Bodies floating down
Floating down
Undertow
