You're my destiny
I can't look away
You're all I see
You're my destiny
I can never leave you
You're my Earth
The center of my day

Why do you keep circling around her?
When I revolve around you like the moon
I can't take a step closer to you
You know how this feels too

Do you dream of her tonight?
Even when I shine on you
You end your day that way
For me, a day feels like a month

I hope the dream stops I hope the night wakes
I hope waves come crash with your calm heart

You're my destiny
The gravity that pulls me
I can't look away
You're all I see
You're my destiny
I can never leave you
You're my Earth
The center of my day

Your heart keeps leaning
Hot or cold it grows with the seasons
But my heart that is always directed to you
Not a single breeze of wind to be felt

Oh, how your day glows
Is there no room for me?
My heart fills then tips over
For me, a day feels like a month

I hope the dream stops I hope the night wakes
I hope waves come crash with your calm heart

You're my destiny
The gravity that pulls me
I can't look away
You're all I see
You're my destiny
I can never leave you

You're my Earth
The center of my day

For once, if I could stand between you and her
To hand you the ring of light
For once, just once
If I could block her from you
And fly through your day

You're my destiny
The gravity that pulls me
I can't look away
You're all I see
You're my destiny
I can never leave you
You're my Earth
The center of my day
