

No War

Lowkey

Peace and blessings to all
Race, colour, creed, countries, lines
Things like that shouldn't separate us
You're part of mankind, be kind to man
There for the children everywhere
No war, no war against Iran
Peace everywhere, love, yeah

No war against Iran, I believe all is the most high land
No bombs, no missiles, no racist dog whistles
The world is God's house, try to keep the lord with you
A child life is valuable, let's deal with raw issues
After we finish that, let's deal with more issues like
Understandin' energy connect us all
Money and politics and greed shouldn't wreck us all

The killers chilling in villas while militants pillage villages
Is it just the pigment they didn't consider innocent?
Villainous, insidious minions, really hideous
The city is clearly envidious when you think of it
Pilja did uncover the truth and they tried to hinder it
Diligent, the wretched of the Earth, they were kin to him
Forget awards, we don't even get nominations
Liberate yourself from the weight of West-toxication
The pain I harbour burns like phosphorous rain on Gaza
They say I'm rather like Sheikh Osama or Che Guevara
But Sheikh Osama was Gates, Carter and Reagan's partner
So we don't rate Osama, neither do we rate Obama
When you measure life in wars, know you're getting older
Still marching on this quest, we will never falter
Clever soldier wisin' up to the death they soldier
Like Hugo Chavez at the UN smellin' sulphur

No war against Iran, I believe all is the most high land
No bombs, no missiles, no racist dog whistles
The world is God's house, try to keep the lord with you
A child life is valuable, let's deal with raw issues
After we finish that, let's deal with more issues like
Understandin' energy connect us all
Money and politics and greed shouldn't wreck us all

We are the children in the classroom you used to shush (Shhh!)
We are the people on the plane getting accusing looks
Got you searching for a mute button you could push
The moment Muntadhar al-Zaidi threw his shoes at Bush (New Godzilla)
We don't have a choice, a little child's last breath is the saddest noise
They call us, they call us paranoid Arab boys
But tabloids describe our killing in the passive voice
It shouldn't take Susan Sarandon for you to fathom
Hurricane Katrina, they're sitting on roofs abandoned
Twenty-five percent of humanity under US sanction
They wonder, what could possess you to fight the powerful?
Decolonise the mind and rise, it might empower you
Military-industrial complex, it's a sour truth
They engineer the wars you fight and even Eisenhower knew

No war against Iran, I believe all is the most high land

No bombs, no missiles, no racist dog whistles
The world is God's house, try to keep the lord with you
A child life is valuable, let's deal with raw issues
After we finish that, let's deal with more issues like
Understandin' energy connect us all
Money and politics and greed shouldn't wreck us all
